The Stewart Morris Cultural Arts Center at Houston Baptist University, Houston, Texas was completed in 2007.

This state of the art facility houses the 365-seat Mary Ann and Bruce Belin chapel and recital hall, a 1,200-seat University Theatre, and several museums.

Texas Scenic Company is pleased to have provided all of the theatrical stage equipment for the chapel and theatre, which were designed by theatre consultant Bill Conner.

The large array of equipment includes 29 sets of counter-weight rigging, stage and acoustical draperies in the chapel and the theatre space, a Wenger orchestra pit filler, ETC dimmer racks and lighting controls, theatrical lighting fixtures from ETC and Altman and Canto followspots.

TSC also worked with Tomcat USA to provide a custom architectural piece in the chapel consisting of connected circular trusses with nine Plexiglas acoustic reflectors designed to hang above the chapel cross.

Texas Scenic Company, established in 1936, is a stage equip-

ment contractor based in San Antonio, Texas. TSC designs, manufactures and installs stage, studio and theatrical equipment for educational, entertainment and broadcast facilities.
